Special Needs: Central Connecticut State University (CCSU) complies with the letter and spirit of the Federal laws, the Americans with Disabilities Act of 1990 and Section 504 of the Rehabilitation Act. CCSU Student Disability Services (SDS) staff approves and coordinates reasonable accommodations that provide equal access and educational equity to undergraduates and graduate students who have a documented disability. Through an individual interactive process, SDS arranges reasonable accommodations, auxiliary aids, and modifications to the learning environment and/or campus based on received documentation and functional limitations of the student.
While it is advisable that students arrange for accommodations prior to the start of the semester, a request and approval for accommodations can be made at any time during the semester. SDS notifies faculty of approved accommodations through an emailed accommodation letter, and students are copied and advised to discuss class accommodation arrangements with their instructors. SDS provides some auxiliary aids and a proctored testing center for accommodated exams. In some cases, SDS staff may contact and consult with faculty to discuss essential requirements of a course or program of study. SDS encourages faculty to also call when questions arise about accommodation arrangements.

In order to make students aware of Student Disability Services, we encourage faculty to include the following suggested syllabus statement and to bring attention to the statement with a general announcement at the beginning of the semester.

SDS appreciates your cooperation and collaboration in ensuring accessibility throughout our campus. Please contact our office if you have any questions or concerns.

Course Description: Applications of statistical methods used for analysis of real-life business problems are illustrated. The development of analytic skills in inferential, descriptive, and exploratory statistics is enhanced by use of Microsoft Office Excel. Chapters 9, 10, 12, 13, and 14 of the textbook will be covered. Few sections of Chapter 15 will also be discussed if time is permitted.

Course Objective: The main objective of the course is to provide the student with an understanding of the concepts and techniques of general statistical methods used in real life today. A thorough understanding of the collection, presentation, analysis, and interpretation of business data is accomplished through the development of formal analytic skills for recognizing and formulating statistical problems in real life decision making.

Withdrawal Policy: After November 17, 2021, withdrawals are allowed only under extenuating circumstances and require approvals of the course instructor, the department chair, and the dean of the School.
