Spring 2021 Survey
Central Connecticut State University

Course: 40284 - BUS 548 01
Department: MGT
Responsible Faculty: Chulho Lee
Responses / Expected: 21 / 25 (84%)

Focus: Overall Results

Q1. Important course information regarding requirements and policies was provided to me.
   Mean: 4.6

Q2. Course learning goals/objectives were included in the course syllabus.
   Responses: [SD] 0 [D] 1 [N] 0 [A] 16 [SA] 21
   Mean: 4.7

Q3. The course evaluated my performance based on the learning goals.
   Responses: [SD] 0 [D] 0 [N] 1 [A] 17 [SA] 21
   Mean: 4.7

Q4. The course content was presented in a manner that helps me understand the subject matter.
   Responses: [SD] 0 [D] 0 [N] 0 [A] 17 [SA] 21
   Mean: 4.7

Q5. The assignments and/or exercises helped me understand the subject matter.
   Mean: 4.5

Q6. The course readings and/or materials helped me understand the subject matter.
   Responses: [SD] 1 [D] 0 [N] 0 [A] 15 [SA] 21
   Mean: 4.4

Q7. The instructor had high standards for student achievement.
   Responses: [SD] 0 [D] 1 [N] 0 [A] 16 [SA] 20
   Mean: 4.7

Q8. The instructor encouraged me to take responsibility for my own learning.
   Mean: 4.5

Q9. The instructor motivated me to work hard to be successful in this course.
   Responses: [SD] 1 [D] 0 [N] 0 [A] 16 [SA] 21
   Mean: 4.6

Q10. I would rate the overall quality of this course as high.
    Responses: [SD] 0 [D] 0 [N] 0 [A] 16 [SA] 21
    Mean: 4.7

Q11. I would rate the overall teaching effectiveness of this instructor as high.
     Responses: [SD] 0 [D] 0 [N] 0 [A] 16 [SA] 21
     Mean: 4.7

Q12. This course helped me meet the learning goals (objectives).
     Responses: [SD] 0 [D] 0 [N] 0 [A] 16 [SA] 21
     Mean: 4.7

Question: What suggestion(s) can you make that would enhance your learning experience in this class?
Response Rate: 66.67% (14 of 21)

1. None. He did a great job. Recorded all classes so you can go back and rewatch if you missed something.
2. To use software that everyone can use because I couldn't connect to Central's remote desktop. It would crash my computer and IT didn't help when I contacted them.
3. This professor went out of his way to help his students. During a time where things were turned upside down, he made sure to keep some kind of normalcy with weekly meetings. He walked us through the course materials. I think he is doing an excellent job and clearly loves what he does. No suggestions!
4. The twice a week video about the problems he posts. It allows you to have an example of how it would work in the real world.
5. Professor Lee has a very well established class format, I can't think of much to enhance it other than perhaps returning these classes to a hybrid format in the fall, as I imagine his presence is electrifying in person.
6. Professor Lee does a great job explaining the material; the recordings are clear and concise. I think if he wanted to enhance the learning he would have to engage students more (but not everyone seems to know what they are doing). I think to enhance my learning experience and everyone else's, Professor Lee should be given a raise!
7. Professor Lee is extremely knowledgeable and passionate about this topic.
8. Often times I found the number of assignments per week to be overwhelming. Each assignment was pretty time consuming and I often feared being able to complete them all each week. I think that fewer assignments would allow more time to focus on the task at hand instead of rushing to finish them all. I also was not happy that there was an optional class meeting time that was outside of what I registered for. I had another commitment on Tuesday nights which was why I chose the Thursday night class. And while Tuesdays were 'optional' if you missed it you missed a lot of information and had to find an extra 1-2 hours per week to watch the lecture video on top of Thursdays class and the multiple assignments. Overall it was a good class, the professor is very nice, but it felt like four times as much work as all my other courses and was often overwhelming.
9. None.
10. None.
11. None. This course was extremely challenging, but the professor was excellent.
None. Excellent as is.

Honestly nothing, the class was great. The professor walked us through examples in order to help us learn the material.

Great professor! Wish we could take this class in person.

Question: Which aspects of this class (e.g., lectures, discussions, readings, assignments, tests, etc.) were the most helpful for learning course material?

Response Rate: 66.67% (14 of 21)

1. The twice a week video about the problems he posts. It allows you to have an example how it would work in the real world.

2. The most helpful for learning course material were the lectures. The professor walked us through examples based on the topic we were learning which helped us learn better. Also, since we used Excel my skills have increased.

3. The lectures were most helpful for learning the course material.

4. The lectures were by far the most helpful for learning the course. He would walk us through the assignments which were all unfamiliar to the class. The assignments themselves were also very helpful as they were all hands on with Excel and could be easily transferred into real world scenarios.

5. The instructor’s knowledge base and enthusiasm for teaching the material for the course were evident in every lecture. The effort he put into his lesson plans were very much appreciated as a student.

6. The assignments, though challenging (and abundant), really helped to understand the material. The lectures were really very good, Professor Lee actually teaches his students, which is really rare these days.

7. Professor Lee is always prompt to respond to any question from any of his students.

8. Professor walk-throughs of topics.

9. Prof Lee has perfected a teaching model that provides a brief background of the lesson we are learning and then he jumps right into walking us step by step through an example to reinforce that weeks topic. He can easily gauge the confidence of the class which is tough remotely and adjust his lecture and example to how well we are understanding it. There was a good mix of individual and group work. While Professor Lee has adjusted well to the online format, I’m sad that I did not get to experience him in person as I imagine his excitement and enthusiasm with the subject matter is amazing in person.

10. Online lectures and open forum the professor provided was great. The assignments assigned were directly related to what was learned/taught in class.

11. I enjoyed the weekly lectures as they were very informative. I also enjoyed the work as a whole as I felt it was relevant to situations that I would deal with professionally. Great class and awesome professor!

12. I did my undergrad at CCSU and am currently pursuing my MBA and I can honestly say that Professor Lee is one / if not the kindest teacher. He truly wants each student to succeed and provides the materials to do so.

13. Everything was well prepared and you should keep doing what your doing.

14. Classes were recorded which allowed students to go back to the lectures and understand the material better.
