Question: What suggestion(s) can you make that would enhance your learning experience in this class?
Response Rate: 72.22% (13 of 18)

1. nothing
2. none
3. none
no suggestions, Professor Lee is a really good teacher, I thought this class was going to be a pain for me but Professor Lee makes it fun to learn. Thank you.

Making some more of the assignments like modules due on Sunday. Would have been easier for me to do work that day instead due to other responsibilities.

Less mindtap exercises on Excel, when the class focus was more on MS Access.

I would suggest adding Tableau permanently to the course material, as it is a good program to know that will be very helpful for all students in the future.

I would suggest to do some of the module lessons in class because those are somewhat harder than the work we do in class. The concepts from the modules are on the exams and that’s what I struggled with the most this semester.

I think this is the first perfectly designed class at CCSU. I learned more about useful tools that I will use in my business career than I have my entire time here at CCSU regarding Excel, Access, and Tableau. Every business student should take this course with Professor Lee.

I have none this was a great class.

For myself personally would be to have been more aware of the due dates of assignments

A little more group interaction incorporated in the class would of been nice, otherwise everything was pretty much up to standard.

Question: Which aspects of this class (e.g., lectures, discussions, readings, assignments, tests, etc.) were the most helpful for learning course material?

Response Rate: 83.33% (15 of 18)

1. Most of the in class learning and homework was very helpful awesome professor who really knows what he’s doing and has had a huge impact on my learning for the better!
2. Learning access before completing the cengage modules on it was very helpful.
3. The professor did a great job explaining course material during class. One of the only professor I have had in my college career that applied knowledge to real world solutions. I believe this professor truly wants his students to succeed in the real world.
4. The modules were very helpful in teaching me how to use Excel/Access, and lessons in class were very helpful from professor.
5. The Hyflex option was extremely helpful to me in the middle of the semester. I had to work some extra hours at my other job and being able to have that flexibility in the morning really helped me out. I feel for senior level classes they should offer more hyflex options as we seniors have earned the right to be a bit more flexible with our time. Plus senior year can be really hectic with jobs and etc.
6. Professor Lee’s commitment to helping his students was most helpful for learning the course material. He went over concepts in detail and always stopped to help students. It made this class pleasant.
7. Professor Lee is wonderful, he is clear, and offers great direction. He truly wants his students to succeed.
8. Learning more about Excel and Access.
9. I would say everything the lectures made the assignments very easy to understand and gain knowledge on, this was one of the best professors I have had as he continuously helped encourage the class and made it extremely easy to learn about this subject and how it will benefit us outside of college.
10. I really enjoyed the work in Excel and Access. It was taught in an effective way that made the work feel fun.
11. I liked how patient the teacher was with us. If we had any questions he would help us no hesitation.
12. I believe the in class material was the most helpful and believe I can use the material in real life jobs.
13. His lectures.

Cengage
Assignments
Excel
Word
Tableau
Access

15. All of the long, exhausting homeworks tests and projects taught me the most.
